

ORIGINAL MR LI MAZ24R 10 Cut Pick & Decoder With Concealed Door Cut Out To Suit Mazda

Description

Original Mr. Li high quality original MAZ24R 10 Cut 2-in-1 Pick to suit Mazda vehicles manufactured from 2020. Some Mazda vehicles manufactured from 2020 on have a covered door lock, not only is the lock covered but the door handle will obscure the lock so that it can not be picked and decoded by the existing MAZ24R because the door handle interferes with the tool's rotation when picking. The MAZ24R-2020 tool is designed so that portions of the reading panel have been removed to allow the tool to rotate around the door handle. This new design means that you will be able to pick and decode Mazda vehicles that have door locks that are obscured by their door handles. Designed and manufactured by Mr Li, the inventor of original Lishi pick & decoders; look for the 'Mr Li' logo for a guaranteed Original Mr Li product.
