

ULTIMATE Pick To Suit Locks 4 Vans

Description

Like all products from UltiM8, the Locks4Vans dimple key lock-pick is extremely simply to use. It's been designed to overcome the Tessa 6P cylinder both quickly & efficiently & will shortly have optional blades to suit other L4V's key profiles & copies that are out there. The blades part-pick the lock for you instantly. Once the innovative pick blades are inserted into the lock, they instantly pick any deep-cuts or lowest pin heights too without you doing anything, which means when it comes to picking or oscillating, the lock is already part picked.

This lock-pick also comes supplied with a password to access free useful instructional/How2 videos to help you master not only the Ultion & 'D' section locks, but other high security cylinders too. There's also an array of other Lock-picking & Locksmith videos together with other bonus 'How2' material.

Kit Contains:

- 1 Blade holder
- 2 x Unique 'Half-Pick' Blades (LB & LD Sections) Locks4Vans & Van Locker
